## Measuring Rainfall

Option 1

### Experiment at home!

Allow your child to predict how much rain will fall and be collected in the bottle / cup.

### What you will need:

A plastic cup or bottle

A permanent marker or  
Pencil

Or strip of paper (for  
after the rainfall collection)

*A rainy day!*

*Repeat the experiment another  
day...*

Your child's predictions will begin  
to have more detail.

Add to your experiment, use more  
than one container and compare  
them.

Option 2
